Product-minded software engineer with experience building and leading backend systems for fintech applications. Trusted early in my career to lead a team of four engineers while contributing hands-on to development. Experienced in designing reliable, user-focused products across multiple domains, with a strong interest in product management, system design and data-driven decision-making.

## Experience

### Associate Software Developer — Eicore Technologies Pvt. Ltd.

March 2025 – Present

- Leading end-to-end development of a backend application using .NET 8, C#, Node.js, and SQL.
- Promoted to project ownership within 2 months of joining as a fresher.
- Managing and mentoring a team of 3–4 developers, including task allocation and code reviews.
- Handling client communication, requirement gathering, sprint planning, and delivery updates.
- Designing RESTful APIs, business logic layers, and scalable database schemas.
- Responsible for performance optimization, bug fixes, and production issue resolution.

### Node.js Web Developer — VinraTech

Nov 2023 – Nov 2024

- Developed full-stack applications using React, Next.js, and Node.js.
- Designed and optimized PostgreSQL and MongoDB databases.
- Built and integrated REST APIs and improved frontend performance.
- Collaborated with designers and stakeholders to deliver responsive UIs.

### Python Developer — LeafyWheels Pvt. Ltd.

Jun 2023 – Oct 2023

- Developed backend APIs and application logic using Python.
- Performed security testing and vulnerability analysis.
- Assisted in building internal tools and improving code quality.

## PROJECTS

### Women Safety App

One-tap SOS with SMS, Firebase push notifications, email alerts and admin dashboard.

- Implemented SOS alerts with SMS, Firebase push notifications, and email alerts to ensure reliable multi-channel notification.
- Added authentication and email verification flows to secure user accounts.
- Implemented real-time location tracking and sharing to trusted contacts during emergencies.
- Developed an admin dashboard for monitoring users and emergency incidents.

### LearnSD – System Design Learning Platform

A structured platform for mastering system design concepts through real-world architectures and guided learning paths.

- Built a full-stack learning platform focused on system design and interview preparation.
- Designed structured learning tracks covering scalability, reliability, consistency, and trade-offs.
- Implemented interactive architecture diagrams, flow explanations, and real-world case studies.
- Developed an admin dashboard to manage tracks, modules, lessons, and difficulty levels.
- Integrated AI-assisted feedback and grading for design explanations and submissions.
- Enabled learner progress tracking across modules and learning paths.

## SKILLS

### Languages:

.NET 8 / C#, TypeScript, JavaScript, Python, SQL

### Frameworks:

Next.js, React, React Native, Tailwind CSS

### Backend:

Node.js, ASP.NET Core, REST APIs

### Databases:

PostgreSQL, MongoDB, Redis, Firebase

### DevOps:

Docker

### Tools:

Git / GitHub, Postman, VS Code

## EDUCATION

### Dronacharya College of Engineering

Computer Science

year of graduation 2025

GPA: 8.2

### ST. THOMAS SCHOOL

94% in 10th grade

93% in 12th grade

## HACKATHON

Rajasthan IT day, Jaipur

TechExpo , IIT Guwahati

Code by Beach , BITS Goa

### Achievements

Smart India Hackathon (SIH) Finalist Chittoor

Conducted a web Development workshop at DCE

### BOOTCAMP

Innovation, Design and Entrepreneurship 1  
Chandigarh 2022

Innovation, Design and  
Entrepreneurship 2  
Jaipur 2023
